**Popular BlueParrott Headset for Truck Drivers Now has even longer Talk Time: B250**

Rollinsford, NH. June 2, 2008- VXI has introduced their next generation BlueParrott B250 Bluetooth wireless headset, which has the same impressive noise canceling technology and over-the-head styling (for the ultimate in wearing comfort and stability), but now includes 10+ hours talk time, quicker button response times and more effective pairing to further enhance the customer's experience. Professional drivers can also take advantage of up to 66 ft. of range.

"The first BlueParrott headset, the B150, set the standard for noise canceling headsets in high noise environments- especially on the road. The B150 has been imitated, but never to our standards. Now, we have built on the B150's advantages and created the B250 which further enhances Bluetooth hands-free communications, allowing our users to experience clear sounding calls for longer periods of time." Said Lisa Keslar, Director of Marketing, VXI Corporation Inc. Truck drivers across the nation have raved about the noise canceling capability of BlueParrott headsets:

"I drive a big rig. This is not an environment where many headsets are usable due to high levels of background noise. My BlueParrott headset effectively handles the background noise here. I've had people comment that I seemed to be in a quiet place when I was climbing a grade at full power. I'm very happy with this product." - Richard Otten, Sacramento, CA

The BlueParrott B250 headset is offered at a highly competitive suggested retail price of \$119.95.

**About VXI Corporation**

Founded in 1989, VXI Corporation designs, develops and delivers telephone headsets for the home and business, as well as other high performance voice communications products for professional, OEM and Internet telephony markets. From the company's first products – professional call center headsets, to its newest line of Bluetooth-enabled solutions, VXI has been at the forefront of translating an understanding of the needs of end-users into innovative, technologically-advanced voice communications products and solutions. VXI's products may be viewed on their websites at [www.blueparrott.com](http://www.blueparrott.com) and [www.vxicorp.com](http://www.vxicorp.com) and are available directly or from major distributors and OEMs throughout the world.
