NEW BLUEPARROTT B200 WIRELESS HEADSET SYSTEM DELIVERS MOBILITY AND COMFORT FOR EXECUTIVES AT THE OFFICE

Rollinsford, NH – October 18, 2005 – Addressing the growing demand among executives for wireless voice communications products to enhance productivity, efficiency and mobility, VXI Corporation today introduced the VXI BlueParrott B200 Wireless Headset System. The BlueParrott B200 is the only Bluetooth-enabled wireless headset with over-the-head styling – for extended all-day wearing comfort and stability, specially designed for executives. The BlueParrott B200 is compatible with multi-line phones, and lets busy executives go completely wireless and hands-free while enjoying high quality audio input and output across a wireless connection of up to 75 feet – the longest Bluetooth headset connection available for office use.

“The BlueParrott B200 is for busy executives looking for new ways to be more efficient, enjoy greater freedom of movement in the office and reduce the physical strain caused by using hand-held telephones,” said Jim Mahaney, vice president, consumer product sales VXI Corporation. “The BlueParrott B200 lets executives work in comfort.”

The BlueParrott B200 includes a base unit, which connects to a business office telephone, and the wireless BlueParrott B200 headset, which rests in the base unit when not in use. System features include:

- Compatibility with most multi-line and digital business phones (including IP), Bluetooth-enabled mobile telephones and Bluetooth-enabled computers
- Professional noise canceling microphone to greatly reduce background noise
- A lightweight, ergonomically balanced headset for all-day wearing comfort
- Additional functionality such as mute, and volume adjustment
- Continuous talk time up to six hours and standby time up to 100 hours
- Headset base serving as a headset mount and continuous charger
- Compact styling complementing other contemporary communications devices
- Simple set up. Unlike other wireless office headsets, there are no compatibility switches to set
- Bluetooth technology eliminates any interference issues often associated with other wireless technologies- allowing for up to 127 wireless headsets to be installed in one office area without any concerns about security or interference
- 128 Bit digital encryption provides air-tight security during wireless communication
- AC adapter

The BlueParrott B200 headset helps eliminate neck, back and shoulder tension and pain associated with cradling of hand-held telephones, including cell phones, between the head and shoulders during extended use.

Compared to other wireless Bluetooth systems for office use, the VXI BlueParrott B200 Wireless Headset System is offered at a highly-competitive suggested retail price of \$199. In addition, the BlueParrott B200 is backed by an industry-leading two-year warranty.

“The BlueParrott B200 gives executives the professional-grade quality, performance and reliability demanded and enjoyed by VXI’s business customers at the world’s largest professional call centers,” said Mahaney.

About VXI Corporation

Founded in 1989, VXI Corporation designs, develops and delivers telephone headsets for the home and business, as well as other high performance voice communications products for professional, OEM and Internet telephony markets.

From the company's first products – professional call center headsets, to its newest line of headsets for use in the home and home offices, including Bluetooth-enabled BlueParrott B200 Wireless Headset System, VXI has been at the forefront of translating an understanding of the needs of end-users into innovative, technologically-advanced voice communications products and solutions.
