New BlueParrott B200 wireless Bluetooth headset system and B200 USB cord accessory supports migration between VoIP and traditional hardphones and VoIP softphones.

Rollinsford, NH. September 27, 2006– To address the growing trend of businesses integrating both VoIP hardphone and PC softphone technology into office communications, VXI Corporation’s BlueParrott® B200 Bluetooth wireless headset system and B200 USB cord accessory provides users a complete wireless headset solution for traditional PBX, IP Phone, and PC softphone communications. By easily and quickly migrating between traditional standard phones and/or IP phones and PC softphones in the office, users can enjoy convenient Bluetooth wireless headset freedom at the home or office.

The **BlueParrott® B200** base unit simply plugs into the telephone handset or headset port and provides communication with the BlueParrott wireless headset (also included) of up to 75 feet via Bluetooth technology. The B200 features all day wearing comfort, professional grade sound and the stability of over-the-head styling.

For those who wish to migrate their BlueParrott B200 over to the computer for use with a PC softphone communications service/application, the addition of the **BlueParrott B200 USB accessory cord** (sold separately) connects the BlueParrott B200 to the computer USB port and allows for easy plug & play installation and transmission of the B200 wireless headset signal to the PC – perfect for use with all PC audio applications.

“Our BlueParrott headsets are well received by customers looking for Bluetooth functionality, noise free calls and true long wearing comfort. Many consumers are initially attracted to the small over-the-ear solutions, but find them to be uncomfortable, wobbly and have difficulty hearing the call. We’ve eliminated these problems for them with BlueParrott’s stable styling and noise canceling features” said Lisa Keslar, Director

of Marketing, VXI Corporation. “Now, we’ve added the ability to migrate their traditional VoIP hardphone solution to a PC Softphone solution with a simple accessory USB cord. We see a strong evolution in telephone technologies. With VXI’s BlueParrott systems, businesses can migrate easily and affordably from their traditional technologies to VoIP”.

Features include:

- Professional quality noise canceling microphone
- Talk time up to six hours. Standby time up to 100 hours
- 128 Bit digital encryption provides airtight security
- Stable fit and long wearing comfort
- Range up to 75 feet.
- Volume, on/off, pairing and mute
- Headset also links to Bluetooth enabled cellular phones
- Unlike other wireless office headsets, there are no compatibility switches to set
- USB Cord compatibility: Windows XP, 2000, Me, 98SE and Macintosh OS 9.1 and higher

The VXI BlueParrott B200 and the BlueParrott B200 USB cord are offered at a suggested retail price of \$199 and \$59.99 respectively. The BlueParrott products are backed by an industry-leading two-year warranty.

About VXI Corporation

Founded in 1989, VXI Corporation designs, develops and delivers telephone headsets for the home and business, as well as other high performance voice communications products for professional, OEM and Internet telephony markets. From the company’s first products – professional call center headsets, to its newest line of Bluetooth-enabled solutions, VXI has been at the forefront of translating an understanding of the needs of end-users into innovative, technologically-advanced voice communications products and solutions.
