Scan the QR code to download the BlueParrott Push-To-Talk App.

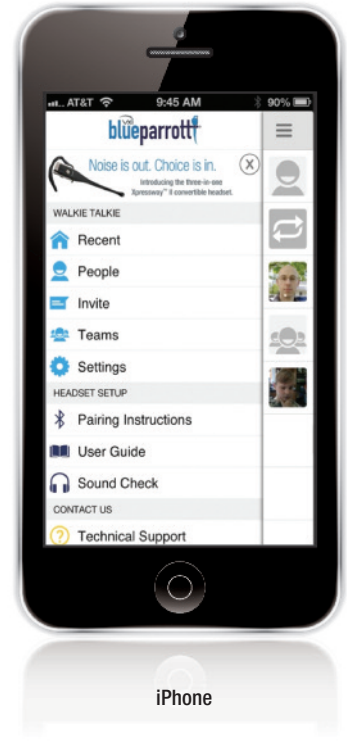

*\*Android OS. The iPhone uses Siri for text-to-speech.*

Works with your iPhone or Android smartphone.

- The VXi BlueParrott Push-To-Talk App adds walkie-talkie capability to your phone.
- Works with your iPhone or Android smartphone.
- Gives you instant access to useful VXi headset setup and support contact information.

## Product Highlights

- Free walkie-talkie capability lets you push-to-talk to your contacts, on Dial2Do's MySay network.
- For Android phones, the SMS Reader reads incoming text messages through your BlueParrott headset. (For the iPhone, Siri handles this function.) *Note: This feature requires an A2DP-capable headset like the VXi Xpress, B250-XT+, or Xpressway II.*
- Headset pairing instruction shows you how to quickly pair your BlueParrott headset and smartphone.
- Easily accesses model-specific user guides to give you all the information you need about your VXi BlueParrott headset.
- Sound Check function lets you know how you sound to others and makes sure your headset is working correctly.
- One-click access to social media sites, including Facebook, Twitter and more.

## Product Specifications

- Developed in partnership with Dial2Do, the BlueParrott app utilizes the MySay network for the push-to-talk/walkie-talkie feature.
- Requires iPhone or Android smartphone.
- The SMS Reader function requires Android OS and an A2DP-capable headset, such as VXi's Xpressway II or B250-XT+.
