

BlueParrott App

How do I customize the BlueParrott Button using the BlueParrott app?

Prerequisites

- [BlueParrott app - iOS](#)
- [BlueParrott app - Android](#)

To customize the BlueParrott Button, follow these steps.

1. Make sure your BlueParrott headset is turned on and connected to your phone.
2. Open the BlueParrott app.
3. Tap **BlueParrott** in the menu.
4. Select your preference from the listed functions.

BlueParrott Button functions

- **Mute**
Mute/unmute the headset microphone while on a call.
- **Battery status**
Announces the battery status.
- **Speed Dial**
Dial the programmed number or phone contact with a press of the BlueParrott button.
- **Push-To-Talk**
Configure the BlueParrott Button with third-party Push-To-Talk apps. Additional third-party options can be created using the [BlueParrott software development kit \(SDK\)](#).
- **Use as MFB***
Use the BlueParrott Button as a Multifunction Button (MFB) to answer calls, end calls, or activate the voice assistant on your connected phone.

- **MFB for second paired device***

Use the BlueParrott Button as a Multifunction Button (MFB) to answer calls, end calls, or activate the voice assistant on a second connected phone.

- **Voice Command***

Your headset will recognize and action voice commands (in English). Refer to the user manual for your BlueParrott headset for a list of available voice commands.
