

BlueParrott B250-XT

How do I transfer audio from my headset to my smartphone?

If you are on a call, you can transfer the audio from your headset to your smartphone.

To transfer the call audio, press and hold the **Volume Down** button until the audio transfers to the smartphone. Repeat the step to transfer audio back to your headset.

When the audio is transferred to your smartphone, the LED on the headset will turn off until audio is transferred back to the headset.
