

# BlueParrott B450-XT MS

## How do I use the Microsoft Teams Walkie Talkie feature with my BlueParrott headset?

### Prerequisites

- Microsoft Teams mobile app (Android or iOS)
- Location services must be enabled for Microsoft Teams, both in the **Apps permission** section and on the main **Location** tab.

### Note

The Walkie Talkie feature must be set up in Microsoft Teams by your system admin. For more information on how to set up, please refer to the official [Microsoft Teams documentation](#).

To use the Walk Talkie feature in Microsoft Teams, follow these steps.

1. Make sure your BlueParrott headset is paired and connected to your Bluetooth device.
2. Open the Microsoft Teams app.
3. Tap the Walkie Talkie icon in the bottom menu. If you don't see it displayed, you will need to tap on **More** to find it.
4. Tap **Channel** to select a group or person.
5. Tap the **Connect** button. The button will show as Disconnect when you have successfully joined the channel.
6. Press and hold the **BlueParrott Button**<sup>™</sup> on your headset when speaking. The microphone will be muted when you release the button.
7. When you are finished, or would like to change channels, tap **Disconnect**.
