

BlueParrott B550-XT

How do I turn off/on the Answer/Ignore voice command for incoming calls on my headset?

Prerequisites

- Firmware - latest version

To turn off/on the Answer/Ignore voice command for incoming calls on your headset, do the following. When not on a call, quickly double-press one of these buttons: **Volume Up/Volume Down/BlueParrott Button™**.

Note

When you have turned off the voice command, there will be a ring signal, but no caller ID voice announcement, for incoming calls. This will be the case until you turn on the voice commands again or reset the headset.

You can also turn off/on the Answer/Ignore voice command using the BlueParrott Updater. The voice command is not accessible through the BlueParrott App.
