

BlueParrott M300-XT

How do I reset my BlueParrott M300-XT?

When you reset your headset, the Bluetooth pairing memory will be cleared and the factory default settings will be restored.

To reset, follow these steps.

1. Power on the headset.
2. Press and hold (6 seconds) the **BlueParrott** button and **Volume Down** button simultaneously until you see the Multi-function button quickly flash purple twice. The headset will play a voice notification and then automatically turn off.

Note

After resetting, you will need to re-pair the headset with your smartphone. Remember to delete the previous pairing before you re-pair.
