

BlueParrott S650-XT

How do I find the firmware version of my headset using BlueParrott Updater?

Prerequisites

- [BlueParrott Updater](#)

To find the firmware version of your headset, follow these steps.

1. Open BlueParrott Updater on your computer.
2. Connect the headset to the computer using a USB cable.
3. Once BlueParrott Updater recognizes the headset, the firmware version will be displayed under **Current Version**.
