

BlueParrott B450-XT Classic

How do I customize the Parrott button using BlueParrott Updater?

Prerequisites

• BlueParrott Updater

To program the Parrott Button using BlueParrott Updater, follow these steps.

- 1. Open BlueParrott Updater.
- 2. Connect your BlueParrott headset to your computer via USB cable.
- 3. Click Configure.
- 4. In the new window, select your preferred setting and click **Save**.

Note

The Parrott Button is configured to mute out-of-the-box and will mute the microphone while both off or on a call.
