BlueParrott S450-XT

How do I customize the Parrott button using the BlueParrott app?

Prerequisites

- BlueParrott app - Android
- BlueParrott app - iOS

To customize the Parrott Button, follow these steps.

1. Make sure your BlueParrott headset is turned on and connected to your phone.
2. Open the BlueParrott app.
3. Tap **BlueParrott** in the menu.
4. Select your preference from the listed functions.

Parrott Button functions

- **Mute**

   Mute/unmute the headset microphone while on a call.

- **Battery status**

   Announces the battery status.

- **Speed Dial**

   Dial the programmed number or phone contact with a press of the Parrott button.

- **Push-To-Talk**

   Configure the Parrott Button with third-party Push-To-Talk apps. Additional third-party options can be created using the BlueParrott software development kit (SDK).

- **Use as MFB***

   Use the Parrott Button as a Multifunction Button (MFB) to answer calls, end calls, or activate the voice assistant on your connected phone.

- **MFB for second paired device***
  Use the Parrott Button as a Multifunction Button (MFB) to answer calls, end calls, or activate the voice assistant on a second connected phone.
- **Voice Command***
  Your headset will recognize and action voice commands (in English). Refer to the user manual for your BlueParrott headset for a list of available voice commands.
