

BlueParrott B250-XTS

How do I reset my Bluetooth headset?

When you reset your Bluetooth headset, the list of devices that have been paired with it is cleared. Follow these steps to reset.

- 1. Turn on your headset.
- 2. Simultaneously press and hold the **Volume up** button and **Volume down** button until you hear two low tones.
- 3. Your headset is now reset.

Note

When your headset has been reset it will not automatically enter pairing mode. You will need to manually re-pair with your Bluetooth devices. Remember to delete the previous pairing before you re-pair.
